Build Your GPR Foundation with Expert Guidance

Our 1-day in-person training at KECO's OKC shop offers hands-on GPR learning with our experts. You'll dive into the 6C process, practice key techniques with KECO tools, and learn to select the right tabs and glues for different conditions. It's an ideal introduction or refresher for technicians at any level.

Ready to advance your GPR skills to the next level?

Join us for a 2-day hands-on training at our OKC shop, designed for all experience levels. You'll learn KECO's 6C process, practice with advanced tools, and master techniques from reading a light to complex damage correction, boosting your GPR skills and confidence.

Enhance Your GPR Techniques for Complex Repairs

Our 3-day advanced GPR training in OKC equips you to tackle larger damage with precision, covering KECO's Repair Continuum, metal flow, lateral tension, and tool selection. Gain hands-on skills to achieve flatter finishes and refine your repair techniques.

Kickstart your Apprentice Program with our GPR & GPR+ training to develop skills in dent repair!

Learning from KECO experts, this course takes a deep dive into damage analysis, inspection, metal flow, tool selection and knock down techniques. Master the KECO 6C Process learning both, the KECO L2E GPR and GPR+ systems with hands-on repair. Gain the confidence to become a dent repairer utilizing GPR pull repair and GPR+ push repair together.

Whether you're a Multi-Shop Operator, Collision or Structural Educator, or ready to explore advanced repair technology, we offer customized GPR training and demos to meet your needs. Contact us to learn more!

Core Training Concepts

Connect

Integrating new tools requires culture change, starting with a genuine connection between trainer and student

Educate

Once connection is established, we introduce the basic equipment use in a presentation format, providing an overview in a distraction-free conference setting

Coach

After the presentation, move to hands-on training in the shop, focusing on coaching rather than demonstration. The trainer's role is to guide and encourage students to actively use the equipment

Immerse

Repetition is key to mastering new skills, so training must allow enough time to build habits. Conversations with shop owners and managers are essential to support the culture change needed for successful equipment use.

Cement

Continued immersion integrates new equipment into the shop's ecosystem, requiring updates to Standard Operating Procedures and repair plans. We work to ensure strong customer engagement for successful adoption

A Breakdown of Training Courses and Skill Mastery

At KECO, we believe that mastering Glue Pull Repair (GPR) requires both a solid understanding of fundamentals and confident application of advanced techniques. Our courses meet you at your level, whether you're just beginning or refining your expertise. Longer trainings offer more hands-on practice, deeper repetition, and a stronger grasp of key concepts. Re-view the table below to find the right course to build your skills and apply professional GPR techniques with confidence.
